Research and Funding Strategy

Objective

- To find a *solution* to tackle the increasing prevalence of dementia in HK
- To establish a model with *proven effectiveness* in slowing down cognitive deterioration → delaying onset/reducing the risk

Research cum Service Stage

Prof Linda Lam, Dept of Psychiatry, CUHK

- Design of intervention and research framework
- Monitoring
- Data collection and analysis

3 NGOs

- Recruitment and engagement of elders
- Service delivery

550 elders with MCI

- Research subjects /service recipients
- Undergo activity intervention for one year
- Cognitive ability assessed

- Evidence-based model established
- Effectively help elders to slow down cognitive deterioration via structured leisure activities

先知先覺
認知障礙預防計劃 APEC

Roll Out/Scale Up Stage

- Invite applications
- 11 NGOs are funded to implement the Model in 44 units over 16 districts
- Training and support for NGOs
- Public education

- Provide solution to social problems
- Create knowledge for better service
- Encourage NGOs to start/develop new service
- Fill service gap
- Enhance NGOs' capacity
- Evidence-based practice + NGOs' involvement → policy advocacy
